INDEX.

PAGE

BURGESS, J. R.

On Wireless Telegraphy and High Potential Currents [Title], - - - - - - - - - - 69

DISCUSSION on "The Treatment of Proportion in Elementary Mathematics" [Title], - - - - - 69

GIBSON, Professor.

Vorlesungen über Geschichte der Mathematik, von Moritz Cantor. Dritter (Schluss) Band, Dritte Abtheilung, 1727–1758.

A Review: with special reference to the *Analyst* Controversy, - - - - - - - - - 9

LEAU, M. L.

"La Perspective d'une Conique est une Conique," Démonstration Elémentaire [Title], - - - 112

MUIRHEAD, R. F.

Against Euler's Proof of the Binomial Theorem for Negative and Fractional Exponents, - - - 38

Note on Continued Fractions, - - - - - 39

A Proof of the Binomial Theorem when the Exponent is a Positive Integer, - - - - - - - 42

OFFICE-BEARERS, - - - - - - - - - 1

SPRAGUE, Dr.

On the Eight Queens Problem, - - - - - 43

PAGE

STEGGALL, Professor.

On a Problem of Lewis Carroll's [Title], - 68

TAIT, Professor,

Centrobaric Spherical Surface Distribution, - 68

THIRD, J. A.

Systems of Circles analogous to Tucker Circles, - 70

Systems of Conics connected with the Triangle, - 99

Systems of Spheres connected with the Tetrahedron, - 108

THOMSON, W. L.

Geometrical Theory of the Hyperbolic Functions, 2

TWEEDIE, C.

Note on the Inequality Theorems that lead up to the Exponential Limit $\underset{x=\infty}{\mathrm{L}}\left(1+\frac{1}{x}\right)=e$, - - 33
